P R E F A C E.

Under direction of the Board of Trustees, the thirteenth annual report of the Missouri Botanical Garden, containing, in addition to the administrative reports of the officers of the Board and the Director, the results of research work performed by the Garden staff or in connection with the institution, is presented to the public.

To remove a misconception evidenced by occasional letters, it may be stated here that the Missouri Botanical Garden is located in St. Louis and is not a State establishment, but the gift to the community of a private citizen, the late Henry Shaw of St. Louis, and that it is administered by a Board of Trustees, the composition of which was indicated in his will founding the Garden, and the membership of which, from year to year, is shown in these reports.

The twelfth report was issued June 22, 1901, though separates of several of the scientific papers included in it had been distributed at earlier dates, indicated at the foot of the first page of each such paper.

These reports are sent to scientific institutions and journals in exchange for publications or specimens desirable for the Garden, and, when possible, reprints of the botanical articles they contain are presented to botanists occupied with a study of the subjects they refer to. Any of the Garden publications not out of print may be purchased at approximately the cost of publication from A. I. Eriksson, Tufts College, Mass.; R. Friedländer & Sohn, Berlin, Germany; W. Wesley & Son, London, England; or the undersigned.
